Microdermabrasion

Naturabrador™

Offer Patients What They Love... a gentle skin treatment that is light on their budget & their lives

Fine Lines

Acne

Sun Damage

Hyperpigmentation

Keloids

Some Scars

Acne Scars

Enlarged Pores

NaturaBrador Microdermabrasion offers the ultimate in effectiveness, precision and flexibility. American made and designed to the highest quality and specification, the whisper-quiet, high-power motor and advanced no clog delivery system delivers a steady, constant and predictable stream of crystals. The micro-adjustable vacuum can tune the system to the smallest increments to offer consistent treatments that vary from the lightest peel to a deep microdermabrasion. With a flick of a switch and the addition of a handpiece, the NaturaBrador System goes into “massage” mode, offering a second treatment option. The dust-free, self-contained crystal handling system, is a reminder that this system was designed for not just performance, but for the operator as well.

NaturaBrador Microdermabrasion treatments work by directing a stream of chemically inert aluminum oxide crystals across the skin to gently remove the upper layers of the skin and stimulate cellular turnover. Newer, healthier skin cells are brought to the top most layer. This improves the texture, tone, and elasticity of the skin.

Treatments are usually pain-free, take around 30 minutes and are typically done as a series (spaced about a week apart) to keep turning the skin cells until the desired result is achieved. This process is so gentle that most people's skin looks fairly normal within a few hours of treatment. Any residual discoloration usually resolves within twenty-four hours. The skin is left softer and smoother looking with increased radiance, clarity, and glow. Patients love it.

Makes Financial Sense

NaturaBrador treatments are an easy acceptance procedure for patients because of the low “down time,” the low treatment costs, and the wide variety of indications that can be treated. Because it is so easily accepted, NaturaBrador Microdermabrasion can significantly add to practice revenue.

Many practices are surprised at the high-revenues and large margins that can be gained with the introduction of microdermabrasion. Treatments are often offered by a physicians staff, take very little time or follow-up, and create re-occurring revenue for many months. A patient typically comes in 2-4 times in a month as an initial treatment regimen.

1	\$ 150	\$ 37,500
2	\$ 150	\$ 75,000
4	\$ 150	\$ 150,000

**NaturaBrador offers the lowest operating costs available.*

Just as many patients make monthly visits to their local beauty salon for hair and nail treatments, many patients make monthly visits to their doctors office as part of a microdermabrasion skin maintenance program.

NaturaBrador™ Quality and Flexibility

The NaturaBrador System was made with one word in mind - QUALITY. From the thin, comfortable hand piece with autoclavable tips and changeable orifice to the precision crafted box that contains the system, no expense or effort was spared in the design or manufacturing. Offering exceptional power and flexibility, the NaturaBrador System is the last piece of equipment needed to build a successful microdermabrasion practice. It's powerful whisper-quiet operation, reliable precision delivery system, and easy to read “ablation depth” dial exceeds even the most demanding operator expectations. With one flick of a switch and a handpiece swap, the unit becomes a massage system with a complete range of handpieces for different body areas. Many people use this for lymphatic drainage treatments.

Safety was considered of the highest importance when the system was designed. The easy to add and empty crystal reservoirs do not require the operators to come in contact with the crystals. Because it is a closed system unit, where used and un-used crystals never mix, the treatment meets the high cleanliness levels of a doctors office. An added air filter reduces air contamination and further protects both the patient and operator. Each of the durable autoclavable hand piece tips can be sterilized for each individual patient. Both operator and patient can feel good about the treatment.

Microdermabrasion Massage Therapy

The precision designed delivery system and comfortable hand piece offers enormous power and comfort for both patient and operator.

The special massage hand piece option brings an additional treatment into your practice. This attachment is used for massage therapy which many people feel is good for lymphatic drainage.

- **Designed and manufactured in the U.S.A.**
- **High-power motor provides strong ablation and long life**
- **Constant-flow design prevents clogging**
- **Lowest disposable costs**
- **Environmentally friendly no-mess, no-dust crystal handling.**
- **Ergonomical hand pieces offers durability and comfort**
- **FDA registered manufacturing**
- **Whisper-quiet operation**
